LOCATION Israel · open to relocation to the Netherlands

SKILLS

Cloud & IaC

AWS CLI, AWS

CloudFormation, Terraform

CI/CD & GitOps

Jenkins, GitHub Actions, GitLab CI, ArgoCD, release management

Configuration & Scripting

Ansible, Puppet, Chef, Python, Ruby, Bash

Monitoring & Observability

Prometheus, Grafana

Linux & Web Servers

Linux, Docker, Nginx, Apache, systemd, DNS, SSL/HTTPS

Development

PHP, Laravel, JavaScript, Node.js, HTML, CSS, REST APIs

Data & Tools

MySQL, Redis, SQLite, Git, GitHub, Agile

EDUCATION

Web Engineering Certificate

John Bryce College

High School Diploma

LANGUAGES

Arabic — Native

English — Fluent

Hebrew — Good

PROFILE

DevOps Engineer at Microsoft automating software delivery and supporting cloud application environments. Hands-on with Jenkins, AWS CLI, AWS CloudFormation, Ruby, Puppet and Chef, and skilled in Terraform, Ansible, GitHub Actions, ArgoCD, Prometheus and Grafana, with experience in release management, infrastructure as code, configuration automation and continuous delivery in agile teams. A long web development background gives a developer's view of the code being shipped and a focus on reliable, repeatable deployments.

EXPERIENCE

DevOps Engineer

2023 – Present

Microsoft

- **CI/CD:** Build and maintain Jenkins pipelines that automate continuous integration and delivery of application releases.
- **Infrastructure as code:** Create and maintain AWS CloudFormation templates to provision consistent, repeatable environments.
- **Cloud operations:** Use AWS CLI to manage cloud resources and support application deployment workflows.
- **Configuration automation:** Apply Puppet and Chef to keep application environments consistent.
- **Scripting:** Write Ruby scripts to automate recurring deployment and operational tasks.
- **Release management:** Coordinate deployment activities, support releases and resolve delivery issues.
- **Collaboration:** Work with development and operations teams in agile environments to improve delivery workflows.

Web Developer

2014 – 2023

Informatika

- **Web applications:** Developed and maintained websites and web applications, implementing new features and ongoing updates.
- **Quality & deployment:** Investigated application issues and supported testing, fixes and deployment of updates.
- **IT Support (2014 – 2017):** Supported users and systems, building strong troubleshooting foundations.

PROJECTS

ZVV — Technical Co-founder & CTO

Startup

Real-estate platform spanning property, bookings, investments and AI

- **Architecture:** Lead technical direction, covering platform architecture, backend/API design, security and CI.
- **AI chat server:** Built and deployed a Node.js / Express chat service with SQLite, run as a systemd service behind Nginx with HTTPS on a VPS.
